To check the oil level, make sure that the ignition is on, the engine stopped and the transmission is in P (park). Access the vehicle information and settings menu and select Service Menu, then Oil Level Display. An Engine Oil Level image is displayed in the instrument cluster message center and shows the current oil level. One of the following messages will also be displayed:

- If the oil level is within acceptable limits, the message OK is displayed.
- If the oil level is less than acceptable, a message advising how much oil to add is displayed e.g. Add 0.5 Litre or Add 0.5 Quart (depending on the market), or Underfilled Refer to handbook for oil volume & type.
- If the message Engine Oil Level Overfilled is displayed, the oil level must be reduced to within acceptable limits before starting the engine again.
- If the message Engine Oil Level Underfilled is displayed, 1.5 litres (2.6 pints) of oil, then recheck the oil level.
- If the message Engine Oil Level Not Available is displayed, the oil level is still stabilizing. Wait 10 minutes and then recheck level.
- If a warning message ENGINE OIL LEVEL MONITOR SYSTEM FAULT is displayed a system fault has occurred. Check for fault codes using the approved Jaguar diagnostic equipment.
- If the oil level is within acceptable limits, the message OK is displayed.
- If the oil level is less than acceptable, a message advising how much oil to add is displayed e.g. Add 0.5 Litre Refer to handbook for oil type or Add 0.5 Quart Refer to handbook for oil type (depending on the market), or Underfilled Refer to handbook for oil volume & type.
- If the message Overfilled Refer to handbook is displayed, the oil level must be reduced to within acceptable limits before starting the engine again.
